

Opticomm offers a number of different cables for connection to and from pin connectors located on Opticomm systems. The required pig-tail is included with each Opticomm system at no charge. Additional pig-tails can be ordered upon request. Below are the types of pig-tail cables used with Opticomm systems.

The DB-15 (High-Density) Pig-tail is used with Pig-tail connections typically found on FMV and FDV series systems.

The DB-9 Pig-tail is used with Pig-tail connections typically found on FMV and FDV series systems.

The Micro DB25 Pig-tail is used with Pig-tail connections typically found on Optiva™ series system.

The DB25 Pig-tail is used with Pig-tail connections typically found on FMV and FDV series systems.
